

This book comes with a teacher!

A traditional introduction to a guitar book tells you that the book you have just bought is better, more up-to-date, more detailed, simpler and more condensed (while also more thorough) than „ordinary“ guitar books. I would hate to break with this tradition – especially as the teaching of musical instruments is so thoroughly rooted in tradition. But I do need to tell you that no guitar book is ever going to play the instrument for you.

The book you are holding possesses one unique quality, however, – never before has a guitar book been sold **together with a teacher!** This has become possible thanks to the Internet. Wherever in the world you may be, a guitar teacher is always within reach. I don't mean a computer – the teacher is a real person! The Internet is only the go-between, enabling you to send your homework from your computer to professional guitar teachers.

A **CD** with audio samples and videos comes with the book.

- *Although I have never seen my teacher, I got a sound foundation in playing guitar for which I am very grateful. I know so much more now and still keep learning!* (Julia, student, 15)
- *Thank you for listening to my jangling and your constructive criticism! I only wish there had been such interactive possibilities 20 years ago.* (Henri, policeman, 41)
- *I started learning guitar with the help of this book together with my friends. To be completely honest we haven't quite finished it because we started our own band half way through the course.* (Sven, entrepreneur, 38)

Kristo Kõo is educating guitar teachers at the Estonian Academy of Music and he is the founder of the web-based guitar school Kitarrikool.eu Besides Kristo's teaching and concert activities one can often hear his recordings played by radio stations all over the world.

Guitar School

The Key to the Practical Guitar Playing

by Kristo Kõo

www.kitarrikool.eu

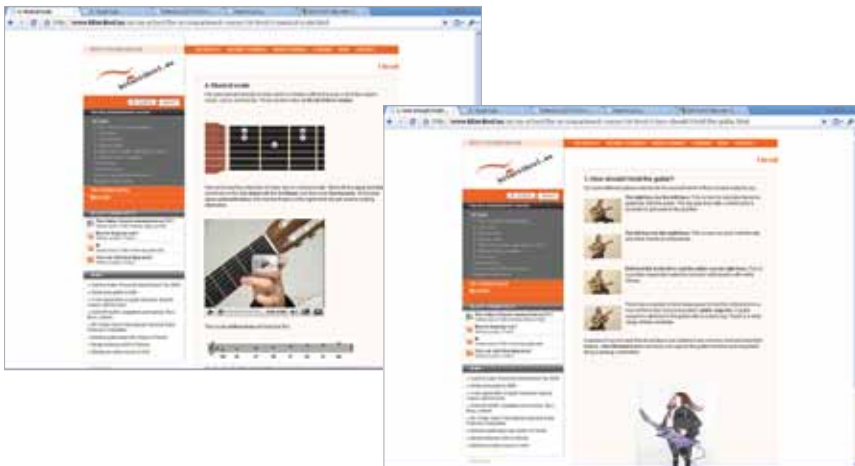

This is how it works:

STEP 1 – get yourself the book „Guitar School – the Key to the Practical Guitar Playing“ either from the online store at shop.kitarrikool.eu or from your local bookstore. Or - if you are not sure yet, start directly from the webschool at www.kitarrikool.eu

Starting is **free!**

STEP 2 – start from the scratch and study the step-by-step exercises given in the first level of the book or the webschool with the help of the photos, texts, cartoons, notes and audio-video examples and record your test exercises.

STEP 3 – upload your work and wait for the feedback.

STEP 4 – if the feedback is positive then you can progress to the next level.

NB! The first feedback is free! From here on you can choose whether to start buying individual levels at webschool, buying the whole online course or still get everything free if you are the happy book-owner!

STEP 5 – work yourself through the whole course and get valuable knowledge and practical skills until you know everything about constructing and playing chords on the guitar.

Where to buy?

- 1) The Guitar School projects online store sends the book directly to you. Order at shop.kitarrikool.eu
- 2) Ask from your local bookstore!
